

Matrix Electronics Limited

Appointed MacDermid Distributor in Canada

April 23, 2010 | News Wire

Matrix is delighted to partner with MacDermid Electronic Solutions to support both sales and service of its flagship Printed Circuit Materials product line.

Since 1977, Matrix has specialized in providing the three key product groups for Canadian Printed Circuit Board manufacturers: **Laminate • Imaging • Chemistry**.

This is the first time in that 33 year period that one company (Matrix) can offer customers all three product categories from Tier ONE Industry PCB Supply leaders.

“We are very fortunate to be able to offer **Panasonic, DuPont and now MacDermid** products”, says Kieran Healy, President of Matrix. “Our customers can now deal with one source for the supply and service of these leading companies to meet their continuing technical challenges.”

Philippe Yee, Imaging and Chemical Manager of Matrix further comments. “Having MacDermid as our partner, gives us an advantage when providing chemical support for the DuPont Imaging films. In addition, we can further augment our support services with the some of the best Plating and Finishing chemistries available.”
