**Matrix USA Expands Panasonic FELIOS Line**

Monday, June 7, 2010 | Matrix USA, Inc.

Recent release and commercialization of RF-775 flex materials from Matrix included 0.00058", 0.0008", 0.001" and 0.002" thicknesses. Matrix is now proud to announce further expansion to include additional thicknesses: 0.003" and 0.004".

All offerings include options with RA or ED copper foils - 9, 12, 18, 35 and 70µ thick.

Secondly, Matrix is pleased to introduce the latest Liquid Crystal Polymer offering RF-705. This world class, high-speed laminate offers solutions to many of today's design challenges for Flex Multilayer applications. RF-705 is available in 0.001", 0.002" and 0.004" thickness with 25µ thick copper foil.

All Panasonic FELIOS laminates are:

- IPC 4204 certified;
- UL certified (\* UL pending);
- 31032 tested;
- Halogen-free;
- 94-VO;
- Feature 160°C operating temperature;
- RoHS compliant; and
- Dimensionally stable.

Panasonic FELIOS provides the "best in class" solutions for the latest digital consumer products: Cellular phones, digital cameras, LCD modules, audio equipment and game consoles.

For more information, e-mail [Dan Kush](mailto:Dan.Kush@matrixusa.us) at 678-736-1200 or visit [www.matrixusa.us](http://www.matrixusa.us).
